EXPERIENCE

Internship

Ascensio

Mar 2023 – May 2023 Remote

- my role is an React Developer

Internship

Regua

May 2023 – Ongoing Remote

- my role is an FullStack Developer

EDUCATION

B.TECH

Rajiv Gandhi University Of Knowledge And Technology

2019-2023 Nuzvid

- CGPA 8.0

Intermediate (PUC)

Rajiv Gandhi University Of Knowledge And Technology

2017-2019 Nuzvid

- CGPA 8.6

PROJECTS

JUST VANS APP

Using React , React-router and Firebase

Mar 2023

- Developed "Just Vans," a professional web app using React, React Router, and Firebase. Users can browse and rent vans by creating an account. Implemented efficient client-side routing, error handling, and loading indicators.
- Managed data flow with data layer APIs. Prioritized responsive design and security measures. Demonstrates proficiency in React, user experience, and adherence to industry standards

PERSONAL WEB PORTFOLIO

Using React + vite

june 2023

- I have developed a personal portfolio website using React, Three Fiber, and Three.js, incorporating stunning 3D models to showcase my skills and projects. I am excited to share with you

[Click here to see this project](#)

SKILLS

- Python3 & C & C++
- Html5 & Css3
- Bootstrap
- Material Tailwind
- Java Script
- React Js 18
- React-Redux
- Firebase 9
- Django 4.1
- Git & GitHub

INTERESTS

- Front-end
- Back-end
- Python development

3D PRINTING SERVICE PAGE

Using React-Redux and Firebase

📅 Mar 2023

- I developed a responsive 3D printing service web application reminiscent of the Nike website. users could upload 3d models , customize models by selecting colors, materials, and printer quality etc..
- Used React, Redux, and Material-Tailwind for the frontend and Firebase as the backend to store userData and customizations

SMILE DETECTOR

Using Open computer vision

📅 Sept 2022

- Developed an application capable of detecting smiling faces from various sources, including images, videos, and webcams.
- Utilized the Haar Cascade algorithm in conjunction with the OpenCV module to develop this application

GET YOUR SUPERHERO

Using Java Script

📅 Dec 2022

- Developed a dynamic web application capable of generating random superhero power statistics or retrieving specific power stats by manually entering a person's name.the data comes from an API source

Street Fighter Game

Using Java Script

📅 AUG 2022

- Designed and implemented an engaging two-player game enriched with music and sound effects. Players engage in dynamic combat, where they can strike their opponent and strategically heal themselves.where the game concludes when a player's health reaches zero, declaring the opposing player as the victor.
